Full-Stack Developer

Highly motivated Computer Engineering graduate with hands-on experience in building scalable web applications using React, Next.js, Node.js, and Python. Proven ability to design and deliver end-to-end solutions, from developing complex role-based access control systems and workflow approvals to implementing clean, modern UI/UX dashboards. Equipped with practical industry experience in containerization and application security from a recent internship. Eager to leverage technical skills and problem-solving abilities in a full-time software engineering role.

EDUCATION

Mae Fah Luang University, Chiang Rai • Computer Engineering

(2022 – 2026)

EXPERIENCE

Software Engineer Intern, Perceptra

(Jan 2026 – Apr 2026)

Tech Stack: Python, Django, Postgres, Docker, Docker Compose, Nginx, Proxmox, Linux

- Spearheaded DevSecOps initiatives by integrating Renovate Bot for automated vulnerability scanning and dependency updates. Implemented hardened container images and generated SBOM (Software Bill of Materials) diffs to evaluate and validate security compliance.
- Upgraded and migrated core system architecture from legacy microservices to a unified platform. Successfully ported existing features to the new version and developed a "Golden Image" deployment strategy for VMs and bootable drives.
- Ensured high system reliability by authoring comprehensive unit tests and resolving complex bugs across multiple services. Collaborated in merging branches and integrating a new UI version for seamless deployment.

UNIVERSITY PROJECTS

The Center for Academic Services, Mae Fah Luang University

(Feb 2025 – Jul 2025)

Tech Stack: Vue.js, Node.js, MySQL, Docker, Docker Compose, Nginx, Cloud VPS, Linux

- Designed and developed a full-stack web application for internal use.
- Implemented multi-role access control, Google login, multi-step project forms with file attachments, workflow approvals, dashboards, and reporting.
- Collaborated with staff to gather requirements, optimize workflows, and ensure smooth deployment.

Hewkad, Senior Project

(Jul 2025 – Dec 2025)

Tech Stack: React.js, Node.js, MySQL, Docker, Docker Compose, Nginx, Cloud VPS, Linux

- Spearheaded the complete software development lifecycle, from initial UX/UI design prototyping to the launch of a fully functional public web application.
- Managed end-to-end production deployment, including cloud server provisioning, domain registration, DNS routing, and web server configuration.

Wanasom Food, Mae Fah Luang University

(Jul 2025 – Dec 2025)

Tech Stack: React.js, Node.js, MongoDB, Docker, Docker Compose, Nginx, Cloud VPS, Linux

- Co-developed a scalable, end-to-end food ordering platform in a 2-person team, taking full ownership of UX/UI design, frontend, and backend architecture.
- Engineered a real-time order management system utilizing Socket.io and integrated the LINE Messaging API to provide live status updates to customers and staff.
- Implemented flexible ordering workflows (Dine-in/Delivery) featuring precise geolocation pinning via Google Maps API and secure user authentication including Google OAuth2.
- Built a comprehensive Admin Dashboard featuring sales analytics, dynamic promotion scheduling, and a custom Content Management System (CMS) for real-time landing page and FAQ updates.
